Subject: RE: Impromptu Porewater Training Scheduled for tomorrow - deliberative

Scott, they might be just talking about the bulk sediment collection. We will ask.

Howard, do you know if they have started that last week?

Thanks,

Subject: Re: EPA and Comments and Follow-up Discussion....

Ken,

EPA has reviewed and approves of Section 4.3 of the porewater FSP, and approved Change Request #10 on Thurs 6/28/18. EPA is conditionally approving the Pre-RD group to conduct porewater bulk sediment collection under the approved Section 4.3 of the porewater FSP and the surface sediment HASP addendum. Please note that any additional activities as they pertain to the porewater investigation that is outside the scope of this conditional approval may not be conducted at this time without EPA approval. Feel free to reach out with any questions.

Thanks,

Davis,

I hope the below email and attachments are what you requested.

Please find attached:

- 1) Redline version of Section 4.3 with our responses and in text edits in response to EPA comments as pdf.
- 2) Clean version of Section 4.3 as word doc. Recommend that EPA adds any comments to this file rather than the pdf for clarity.
- 3) The operating manual for the optical DO probe which will be included in Appendix B of the FSP.
- 4) The operating manual for the ORP probe which will included in Appendix B of the FSP.

Please let me know if you need anything else.
